### Senior Developers

The ideal candidate should have seniority in development, be up to work in a new fresh agile team and be very interested in newest technology.

We are looking for developers in positions as Test Developers, Platform Developers, Application Developers.

It is expected that the candidate is interested and structured enough to do for example evaluation of new technology including presentation to the team without close guidance.

#### **Must Haves:**

- \* Experience as Java Developer
- \* good Linux knowledge
- \* Experience with Spring / Java EE
- \* experience in developing webapplications / webservices / REST
- \* experience with Continuous Integration / Delivery
- \* good knowledge in network technologies (IP, DNS, DHCP)

#### **Good to have:**

- \* experience with Spring 4, Spring Boot / Spring Cloud
- \* Knowledge about microservice development & architecture
- \* experience in DevOps and Infrastructure as Code
- \* experience with Docker, Kubernetes
- \* experience with Virtualisierung (VMWare, Parallels, Virtualbox)
- \* experience with Kafka, Message Queues
- \* experience with NoSQL databases

**Salary appr. 55000€ - 60000€/year according to qualification.**
